LinkedIn: Vinay Kumar Rao Pikala | GitHub: vinaykr-22

EDUCATION

Malla Reddy University

B.Tech - Information Technology

Expected 2027 | CGPA: 8.6/10

Narayana Junior College

Intermediate (MPC)

Graduated: 2023 | Score: 90%

TECHNICAL SKILLS

Languages

Python, Java, C++, JavaScript,
HTML/CSS

Web Development

React, Vite, React Router, CSS
Architecture

Cloud & Databases

AWS (S3, RDS, Lambda), MySQL,
SQLite, MongoDB

Tools & Concepts

Git, GitHub, REST APIs, OOP, Data
Structures & Algorithms, Machine
Learning (K-Means, DBSCAN)

CERTIFICATIONS

Introduction to Modern AI

Cisco Networking Academy | Feb 2026

AWS Solutions Architecture Simulation

Forage | Jul 2025

Responsive Web Design

freeCodeCamp | Jun 2025

Intro to Algorithms and Analysis

NPTEL IIT Kharagpur | 2025

PROFESSIONAL SUMMARY

Driven Information Technology undergraduate with a strong foundation in full-stack web development, cloud architecture, and modern AI tools. Proven ability to build responsive React applications and architect scalable solutions, recently demonstrated through active participation in major competitive hackathons.

EXPERIENCE & COMPETITIONS

IBM BOB Hackathon

May 2026

AI Development Competitor

- Collaborated within the *ibm-hackathon-lablab* team to architect and deploy AI-driven solutions under strict competition deadlines.

Meta PyTorch Hackathon

Apr 2026

Deep Learning Participant

- Developed and submitted deep validation project work for Phase 2, utilizing advanced PyTorch capabilities to solve complex modeling challenges.

AWS Academy (via AICTE EduSkills)

Jan 2026 – Mar 2026

Cloud Virtual Intern

- Designed and mapped cloud architectures utilizing core AWS services, focusing on deployment models, scalable cloud systems, and modern compute workflows.

PROJECTS

University Bus Live Tracking System

- Developing a real-time location tracking system utilizing map APIs integrated directly into the university portal to optimize student commutes.

Movie Watchlist Application (React + Vite)

- Engineered a multi-page tracking application allowing users to curate personal watchlists.
- Implemented dynamic rendering, React Router for seamless navigation, and complex state management to ensure a highly responsive user interface.

React Task Manager

- Built a comprehensive CRUD application with state management to process task additions, edits, and deletions with zero latency.

ShopX & Temple Tranquil Platforms

- Developed front-end prototypes for a dual-sided e-commerce platform and a centralized aggregator for pilgrimage bookings, streamlining user access across multiple portals.
